

## Project Overview

- Installation of bespoke eco friendly garden rooms across the south of England.
- Site inspection prior to delivery of the units.
- Regular visits to check on progress and quality of installation.
- Final sign off with the clients and satisfaction survey.

## Service Provided

Shape Consultants Limited was commissioned to provide project management support for the on-site installation of eco friendly garden rooms.

## Project Highlights

Shape Consultants Limited was commissioned to provide project manager support for the on-site installation of eco-friendly garden rooms by My Eco Space in the southern half of the country.

We attended clients' homes prior to installation to do a site check and ensure the site was ready for the installation then liaised with the head office on the delivery date and site installation team.

Regular site visits were made to check the progress of the build and manage any client queries.

Upon completion we reviewed the build with the client, ensuring any defects were resolved by the installation team before acquiring client sign off, including completion of the satisfaction survey.
